ABOUT ME

Full Stack Developer with hands-on experience in building responsive and scalable web applications using HTML, CSS, JavaScript, React.js, Node.js, Express.js, MySQL, and Sequelize. Skilled in front-end and back-end development, REST APIs, database management, and CRUD operations. Passionate about writing clean, efficient code, solving real-world problems, and continuously learning new technologies to deliver high-quality digital solutions.

WORK HISTORY

1. A2 Logic Group

1 Year

Full Stack Developer

- Developed and maintained responsive web applications using React.js, Node.js, Express.js, and MySQL.
- Designed and integrated RESTful APIs for seamless front-end and back-end communication.
- Built authentication, authorization, and role-based access control systems.
- Developed Admin Dashboard with complete CRUD operations for Users, Categories, Products, and Orders.
- Optimized database queries and improved application performance, reducing page load time by 30%.
- Integrated file upload, form validation, and secure authentication using JWT.
- Used Git and GitHub for version control and team collaboration.
- Fixed bugs, improved UI/UX, and deployed applications on Vercel, Render, and Netlify.
- Collaborated with designers and team members to deliver projects on time.
- Successfully delivered 5+ full-stack web applications with clean, maintainable, and scalable code.

2. Neo Artifact Geeks

2025 - Present

Full Stack Developer

- Developed and maintained responsive web applications using React.js, Next.js , Node.js, Express.js, MySQL, and MongoDB.
- Built secure RESTful APIs and integrated them with front-end applications for seamless data flow.
- Designed and implemented Admin Dashboard with complete CRUD functionality for users, products, categories, and orders.
- Implemented JWT authentication, role-based access control, file uploads, and form validation.
- Optimized application performance and database queries, improving speed and user experience.
- Collaborated with UI/UX designers and team members using Git and GitHub for version control.
- Integrated AI tools such as ChatGPT, Gemini, and GitHub Copilot to improve development productivity.
- Deployed and maintained applications on Vercel, Render, and Netlify while ensuring scalability and reliability.
- Fixed bugs, enhanced existing features, and delivered projects within deadlines using Agile methodologies.

PROJECTS

Artifact Geeks

<https://artifactgeeks.com>

- Developed and maintained the official ArtifactGeeks platform, an AI-powered education and digital services website that offers industry-ready training programs, internship opportunities, corporate training, and software development services. Implemented responsive user interfaces, integrated dynamic course management features, optimized website performance,

and developed secure backend APIs with database connectivity. Collaborated with the team to deliver a scalable, user-friendly platform that enhances user engagement and supports business growth through modern web technologies.

- Key Features
- Responsive and mobile-friendly user interface.
- Course, internship, and training program management.
- Contact and inquiry form integration.
- RESTful API development and database management.
- Performance optimization and SEO-friendly architecture.
- Secure authentication and scalable backend services.
- Deployment and maintenance of production-ready applications

AI JobFit

<https://aijobfit.artifactgeeks.com>

- Developed an AI-powered job matching platform that enables job seekers to analyze their resumes, match their skills with job requirements, identify skill gaps, and receive personalized career recommendations. Built a scalable and responsive application with secure authentication, optimized APIs, and SEO-focused architecture to deliver a seamless user experience.
- Key Features & Contributions:
- Developed SEO-friendly web pages using Next.js with Server-Side Rendering (SSR) and Static Site Generation (SSG).
- Implemented dynamic metadata, Open Graph tags, sitemap.xml, and robots.txt to improve search engine visibility.
- Integrated Google OAuth 2.0 for secure and seamless user authentication.
- Implemented Google reCAPTCHA v2 and v3 to prevent spam and enhance application security.
- Developed secure RESTful APIs for authentication, resume management, and job matching.
- Optimized application performance, API response time, and overall user experience.
- Used Git, GitHub, and GitLab for version control, collaboration, and code management.

Namdev Community

<https://namdev-community.artifactgeeks.com>

- Developed a modern community management platform that enables members to connect, register, manage profiles, and access community-related information through a secure and user-friendly interface. Built a scalable full-stack application with responsive design, secure authentication, and optimized performance to enhance user engagement and simplify community management.
- Key Features & Contributions
- Developed responsive and SEO-friendly web pages using Next.js with Server-Side Rendering (SSR) and Static Site Generation (SSG).
- Implemented dynamic metadata, Open Graph tags, sitemap.xml, and robots.txt for improved search engine visibility.
- Integrated Google OAuth 2.0 for secure user authentication and seamless login.
- Implemented Google reCAPTCHA v2 & v3 to prevent spam and enhance application security.
- Built secure RESTful APIs for user registration, profile management, and community services.
- Optimized application performance, API response times, and overall user experience.
- Implemented responsive UI components using React.js and Next.js.
- Used Git, GitHub, and GitLab for version control, collaboration, and code management.

AG CRT – Corporate Landing Website

<https://dev.ag-crt.pages.dev>

- Developed a modern, responsive, and SEO-friendly corporate landing website using Next.js. Built as a static website with a focus on high performance, fast loading, and an optimized user experience. Implemented best SEO practices and deployed the application on Cloudflare Pages for reliable global content delivery.

- Key Features & Contributions
- Developed a fully responsive and mobile-friendly static website using Next.js.
- Implemented Static Site Generation (SSG) for faster page loading and improved performance.
- Optimized the website for SEO using dynamic metadata, Open Graph tags, sitemap.xml, and robots.txt.
- Improved Core Web Vitals and page performance for better search engine rankings.
- Created reusable React components for a clean and maintainable codebase.
- Optimized images, fonts, and assets to reduce load time and enhance user experience.
- Deployed and maintained the website on Cloudflare Pages with Git-based deployment workflows.

Personal Portfolio Website

<https://kuldeep-kmt-portfolio.vercel.app>

- Designed and developed a modern, responsive, and SEO-optimized personal portfolio website using Next.js to showcase professional experience, technical skills, projects, and contact information. Built as a static website with a strong focus on performance, accessibility, and a seamless user experience across all devices. Deployed on Vercel for fast and reliable global delivery.
- Key Features & Contributions
- Developed a fully responsive and mobile-friendly portfolio using Next.js.
- Implemented Static Site Generation (SSG) for improved performance and faster page loading.
- Optimized the website for SEO using metadata, Open Graph tags, sitemap.xml, and robots.txt.
- Created reusable and maintainable React components following modern development practices.
- Optimized images, fonts, and assets to improve Core Web Vitals and user experience.
- Integrated a contact form and social media links for professional networking.
- Deployed and maintained the application on Vercel with Git-based deployment workflows.
